

PREPARE YOUR HOME FOR EV CHARGING

RECEIVE UP TO \$4,200 TO UPGRADE YOUR HOME'S ELECTRIC PANEL

When preparing to get your home ready to charge an electric vehicle, you may find you need to upgrade your electrical panel. If you live in a single-family residence, SCE's Charge Ready Home program can make upgrading more affordable.

WHY UPGRADE YOUR ELECTRICAL PANEL?

Electrical panel upgrades are often necessary if you plan to install a level 2 charger and have an electrical panel of less than 200 amps.

Upgrading your home's electrical panel will help your home run more efficiently, increase the safety and efficacy of your electrical systems, as well as enhance your property's value.

GET YOUR ELECTRICAL PANEL IN CHARGE-READY SHAPE.

Apply today and take the first step in securing your rebate. Visit evhome.sce.com or scan the QR code to apply.

REBATE OPTIONS

- ✓ \$4,200 rebate for qualified low-income households or enrollees in at least one qualifying public assistance program
- ✓ \$2,100 rebate for qualified households located in disadvantaged communities (DAC)

HOW IT WORKS

1. Complete an application online at evhome.sce.com.
2. Choose your own licensed contractor or select from our list of eligible contractors in your area.
3. The contractor will complete the panel upgrade and work with you to submit your rebate.
4. Receive your rebate electronically or by mail.
